TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right hand corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
  
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their Tariff approval process, the most current sheet number on file with the Commission is not always the Tariff sheet in effect. Consult the Check Sheet for the sheet currently in effect.
  
- C. Paragraph Numbering Sequence - There are six levels of paragraph coding. Each level of coding is subservient to its next higher level:
  - 2.
  - 2.1
  - 2.1.1
  - 2.1.1.A
  - 2.1.1.A.1
  
- D. Check Sheets - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the filing. The Check Sheet lists the sheets contained in the Tariff, with a cross-reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. An asterisk (\*) designates all revisions made in a given filing. There will be no other symbols used on this sheet if these are the only changes made to it. The Tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the Commission.
