TARIFF FORMAT SHEETS

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet revision on file with the KPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the KPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are eight levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i).
- D. Check Sheets - When a tariff filing is made with the KPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if there are only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the KPSC.

SECTION 3 - SERVICE DESCRIPTIONS

3.1 Local Exchange Service - Applicable

The Company's Local Telephone Service provides a Customer with the ability to connect to the Company's switching network which enables the Customer to:

- place or receive calls to any calling Station in the local calling area, as defined herein;
- access basic 911 Emergency Service if available in the Customer's area;
- place or receive calls to 800 telephone numbers.

Local service will be offered on a per call basis or flat rate basis to Customers originating calls from locations within the service area of the incumbent LECs in the Commonwealth of Kentucky. Such service is available twenty-four (24) hours a day and seven (7) days per week.

3.1.1. Basic Local Exchange Services – Availability of Service

3.1.1.1. PREFERRED LOCAL - RESIDENTIAL I: Local telephone service offered to end users at a residence or place of dwelling where the actual or obvious use is for domestic purposes.

3.1.1.2. PREFERRED LOCAL - RESIDENTIAL II and III: Local telephone service offered to end users at a residence or place of dwelling where the actual or obvious use is for domestic purposes and the end user is unable to or chooses not to attempt to establish satisfactory credit for other residential service. End users who choose this service will not be required to post a deposit and agree to have certain features such as directory assistance, operator services, and toll calling blocked. The end user is still responsible for all charges for calls billed to their number.

3.1.2. Customer Calling Features

3.1.2.1. PREFERRED CALL FORWARDING: Allows the automatic forwarding (transfer) of all incoming calls to another telephone number. The line can be restored to normal operation at any time.

3.1.2.2. PREFERRED BUSY CALL FORWARDING: Allows the forwarding of incoming calls when the line is busy. The forwarded number is fixed by the service order. Calls may be forwarded outside the local central office.

SECTION 3 - SERVICE DESCRIPTIONS (Continued)

3.1. Local Exchange Service (Continued)

3.1.2.4. PREFERRED CALL WAITING: Sends a tone signal while a call is in progress to indicate a second call is waiting; and, by operation of the switchhook, to place the first call on hold and answer the waiting call. Operation of the switchhook permits passage back and forth between the two calls, but a three way conference call cannot be established.

3.1.2.5. PREFERRED CANCEL CALL WAITING: Allows the dialing of an activation code prior to making a call, to cancel the Preferred Call Waiting feature. Preferred Cancel Call Waiting must be activated each time Preferred Call Waiting is to be canceled. Exception: If a Preferred Custom Calling Service that provides "flash privileges" such as Preferred Three Way Calling is subscribed to, the Preferred Cancel Call Waiting feature can be activated while an incoming or outgoing call is in progress.

The rates and charges for Preferred Call Waiting include the Preferred Cancel Call Waiting arrangement.

3.1.2.6. PREFERRED THREE WAY CALLING: Three Way Calling allows the addition of a third party to an established connection. When the third party answers, a two way conversation can be held before adding the original party for a three way call. The initiator of the call controls the call and may disconnect the third party to reestablish the original connection exclusively or establish a connection to a different third party. The feature may be used on outgoing and incoming calls.

3.1.2.7. PREFERRED SPEED CALLING: Allows placing call to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight code list or thirty code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, an activation code is dialed, a second dial tone is received and a one or two digit code (for the eight and thirty code lists respectively) plus the telephone number is dialed. Preferred Speed Calling is only available to those customers presently subscribing to Speed Calling.

3.1.3. Installation Services

3.1.3.1. PREFERRED WIRING: Installation of simple residential wiring where installation and other related premises work does not require more than one man hour of work.

SECTION 3 - SERVICE DESCRIPTIONS (Continued)

3.2. Billing Periods

Unless otherwise indicated, for commercial or residential measured rate Commonwealth of Kentucky calls there is generally a one minute minimum charge, with additional time billed in increments of one minute with full minute rounding unless otherwise indicated. Timing on completed calls begins when the call is answered by the called party. Timing terminates on all calls when either party goes to the on-hook mode.

3.3. Timing of Calls

The customer's usage charge is based on the actual usage of The Company's network. Usage begins when the called party picks up the receiver. When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. A call is terminated when either party hangs up.

3.4. Minimum Call Completion Rate

The customer can expect a call completion rate (number of calls completed / number of calls attempted) of not less than 98% during peak use periods.

3.5. Uncompleted Calls

There shall be no charge for uncompleted calls.

3.6. Calculation of Distance

In the event the company provides mileage sensitive products, then usage charges are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are produced by Bell Communications Research in their NPA-NXX V & H Coordinates Tape and Bell's NECA Tariff No. 4.
