TARIFF FORMAT

Sheet Numbering - Sheet numbers appear in the upper right corner of each page of the tariff and are numbered sequentially. New sheets that must be added between existing sheets are enumerated by decimal. For example, addition of a page between sheets 14 and 15 would be 14.1.

Sheet Revisions - Sheet revisions are also noted in the upper right hand corner and indicate the most current sheet on file, canceling the previous sheet. For example, 1st Revised Title Sheet will cancel and be inserted for the Original Title Sheet. The Check Sheet will indicate the most current effective sheet.

Paragraph numbering - Sections are numbered sequentially. Paragraphs within sections are also numbered sequentially, with the subparagraphs indicated by consecutive lower case alphabetic designation. Further subdivision is indicated by consecutive numbers enclosed within parenthesis, then consecutive letters enclosed within parenthesis. For example:

Section 1, 5.a.(1)(a)(i)

Check Sheets - When a tariff filing is made, an updated check sheet accompanies the filing. The check sheet lists all of the sheets contained within the tariff and are cross referenced to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file.
