34. TAMPERING (continued)

“Tampered and Interfeared with” refers to any activity that would prohibit a meter or any other electrical equipment for accurately recording electric consumption at any given metering point. Examples of this would include, but not limited to, drilling holes and inserting objects into meter to “slow down” the meter. Other examples are turning the meter upside down, bypassing the meter and changing/destroying settings or components of a meter.

The process and factors used to estimate the amount due for services not registering on a meter would include determination of the last accurate reading on the consumer’s meter, review and analysis of consumer’s usage history and any other pertinent information. These factors would be used to apply a method of averaging to determine estimated usage.

The rates for such procedures are as follows:

Testing meter for accuracy:	\$30.00
Replacements:	Actual Cost
Repairs:	Actual Cost
Inspections:	\$30.00
Investigations:	\$30.00
Protective Installation (installation of specialized tamper-resistant security band and meter base lock):	\$30.00 labor plus actual cost of equipment
