

**Section DSM - 1**

(N)

**Electric Thermal Storage Incentive Program**

**Purpose**

The Electric Thermal Storage (“ETS”) Incentive program provides retail members with a cost-efficient means of using electricity for space heating. A discounted rate for ETS energy encourages retail members to use electricity for heating during off-peak hours. This improves the utility’s load factor, reduces energy costs for the retail member, and delays the need for new peak load capacity expenses.

**Availability**

This program is available to residential members in all service territory served by FME.

**Eligibility**

The ETS heater must replace one of the following primary sources of heat: 1) heat pump that is at least 10 years old; 2) baseboard heat; 3) ceiling cable heat; 4) electric furnace; 5) wood burning heat source; or 6) propane. Also eligible are ETS heaters that are being installed to heat a room addition to an existing home (e.g. finished basement.)

**Incentive**

FME will pay a \$500 incentive to the retail customer that meets the eligibility requirements.

**Term**

The program is an ongoing program.
