**Commercial & Industrial Advanced Lighting Program**

**Purpose**

The Commercial & Industrial Advanced Lighting Program is an energy efficiency program that encourages commercial and industrial customers to install high efficiency lamps and ballasts in their facilities.

**Availability**

This program is available to commercial and industrial facilities located in all service territory served by Owen Electric Cooperative.

**Eligibility**

To qualify for the Commercial & Industrial Advanced Lighting Program the customer must be on a retail commercial or industrial rate. The business must have been in operations for at least two years prior to January 1, 2011, and be current on its power bill payment to Owen Electric Cooperative. No empty buildings, inactive warehouses, or inactive storage areas shall qualify. The business must be open or have its normal lighting load on for at least 50 hours per week. Retrofits of parking lot lighting, provided on photocell control, are eligible.

**Rebate**

Owen Electric Cooperative will provide an incentive to the customer of \$213 for each kW of lighting load reduction for businesses open 50 hours a week or more. East Kentucky Power Cooperative will reimburse Owen Electric Cooperative an additional \$320 for each kW of lighting load reduction, which is to compensate for lost revenue. For commercial customers, East Kentucky reimbursements are limited to \$15,000 per upgrade (total of both customer and Owen Electric Cooperative rebates) for any facility. For industrial customers, East Kentucky reimbursements are limited to \$30,000 per upgrade (total of both customer and Owen Electric Cooperative rebates) for any facility.

**Term**

The Commercial & Industrial Advanced Lighting Program is an ongoing program.

**Verification Procedure**

Qualifying lighting must be identified or documented by Owen Electric Cooperative staff prior to retrofitting. After the customer completes the retrofit, Owen Electric Cooperative staff must verify the installed lighting retrofit. Demand and energy savings will be calculated based on lighting information gathered during the visits. Owen Electric Cooperative personnel will utilize the manufacturer's lighting fixture specifications and known measurements to calculate the savings; rebates under this tariff will be paid after these verification procedures are complete.
