Average Underground Cost Differential

(Filed in compliance with 807 KAR 5:041 Section 21 (5))

Average cost differential of individual single phase underground primary:

Option I: Cooperative to provide complete installation: **\$13.73/ft.***

Option II: Customer to trench, furnish and install all conduit and fittings, and back-fill per the Cooperative's specifications. The Cooperative will in turn, complete the installation and credit the customer \$6.82/ft. against the above differential cost for the customer's contribution in kind: $\$13.73 - \$6.82 =$ **\$6.91/ft.***

Average cost differential of underground residential service:

Option I: Cooperative to provide installation for a minimum charge of **\$480.00 plus material and labor** for all underground residential services 100 feet or less in length. For underground residential services greater than 100 feet in length, the differential cost shall be **\$4.80/foot, plus material and labor***; in either case up to but not including the Customer's service entrance. (See attached work sheet.)

Option II: Customer to trench, furnish and install all conduit and fittings, and back-fill per the Cooperative's specifications. The Cooperative will in turn and in consideration of the Customer's contribution in kind, complete the installation at: **No Charge.**

***Note:** The above differential costs do not include rock removal or other procedures which may be taken to assure proper burial depth. If rock is encountered or other procedures are necessary to ensure proper burial depth, the actual additional cost shall apply.
