3 YR Weighted Average Underground Cost Differential

Filed in compliance with 807 KAR 5:041 Section 21 (5)

Weighted Average Cost Differential-Individual Single Phase Underground Primary: (T)

Description	Cost per Foot	
3 YR Weighted Average Cost, Individual Single Phase U/G Primary	\$13.69	(T)(R)
3 YR Weighted Average Cost, Individual Single Phase O/H Primary	\$ 9.70	(T)(R)
**Weighted Average Underground Differential Cost	\$ 3.99	(T)(R)

The above cost assumes the member will trench, furnish and install all conduits, and back fill in accordance to Shelby Energy Cooperative's ("Shelby Energy") specifications. Upon completion and submittal of all inspections, Shelby Energy will in turn, furnish and complete the installation of all conductor and make all necessary connections.

If a member elects underground primary for a line extension, the member is responsible for the full average cost as outlined above. However, credits may be applied to the average costs as applicable based on the facilities being served as set forth in Shelby Energy's Rules and Regulations.

For example, Section 40 of the Rules and Regulations allows an extension, via the least expensive route, to a permanent residence of 1,000 feet or less without charge. Therefore, if a member elected underground primary for a line extension to a permanent residence, a credit would be applied to the average underground costs in the amount of \$9.70 per foot up to the first 1,000 feet, resulting in a per foot cost of \$3.99. Any additional footage over 1,000 feet would be billed at the full average underground cost of \$13.69. (R)

Weighted Average Cost Differential-Individual Single Phase Underground Service: (T)

Shelby Energy strongly encourages all members to install secondary services underground. Therefore, Shelby Energy will install underground secondary services at **No Charge**.

However, this assumes the member will trench, furnish and install all conduits, and back fill in accordance to Shelby Energy specifications. Upon Completion and submittal of all inspections, Shelby Energy will in turn, furnish and complete the installation of all conductor and make all Necessary connections.
