

STANDARD RIDER

Special Rate for Non-Residential Electric
Space Heating Service - Rate LC

C-8-79

Applicable:

To Large Commercial Rate LC.

Availability - Restricted:

The special rate set forth in this rider shall be available during the eight monthly billing periods from October through May (hereinafter called "heating season") to customers regularly taking electric service under Rate LC. Such special rate shall apply to separately metered service to electric space heating equipment installed and operated in accordance with the terms and conditions herein set forth. This rider will continue to be available only to customers that were served hereunder on August 20, 1975, and will not be available for the addition of new customers.

Rate:

For all consumption recorded on the separate meter during the heating season the rate shall be 2.458¢ net per kilowatt-hour. This special rate shall be subject to the Primary Service Discount, Fuel Clause and Prompt Payment Provision embodied in Rate LC.

During the four non-heating season months any electric usage recorded on the separate space heating meter shall be combined with metered usage for other purposes at the same location and be billed at the regular rate applicable to such other electric usage. The separate meter for space heating service under this rider will be equipped to measure kilowatts of maximum demand; however, during the eight months of the heating season demand readings of such meter will not be used for billing, and the special rate will be applied to kilowatt-hour readings only. During each of the remaining four months of the year, Rate LC will be applied to the combined 15-minute maximum demands and the combined kilowatt-hour consumptions of both the separately metered heating service and service for other purposes at the same location. (For service connected under this Rider prior to February 1, 1974, demands will be combined on a coincident basis.)

Minimum Bill:

The minimum charge per heating season for service under this rider shall be \$6.00 per kilowatt of connected heating load but not less than \$175.00 per heating season. This minimum charge is in addition to the regular monthly minimum of Rate LC to which this rider applies. However, demands attributable to service under this rider shall not be considered as part of the maximum demands to which the "50% ratchet" provision of Rate LC applies, nor shall demands attributable to air conditioning equipment served under Rate LC be used in applying such 50% ratchet provision.

STANDARD RIDER

Special Rate for Non-Residential Electric
Space Heating Service - Rate LC (Continued)

Special Terms and Conditions:

1. Service under this rider is available only upon written application and subject to Company's inspection for the purpose of establishing eligibility of customer's heating installation for service hereunder. All electrical equipment and wiring, including provision for the installation of Company's meters, shall be subject to the approval of the Company.

2. The design, type, and manner of operation of customer's space heating installation served hereunder must be acceptable to Company. The heating equipment shall be of approved type, designed and used as the primary and predominating source of heat during the full heating season for a building or an enclosed and well-defined section of a building. Under no circumstances will this rider apply to an electric heating installation used as a supplement to some other form of space heating.

3. The heating equipment served hereunder shall be supplied with electrical energy through one or more special circuits so designed and constructed that no other electricity consuming devices may be connected thereto. Provided, however, that when air cooling or air circulating equipment is operated in connection with the heating equipment served hereunder and it is impracticable to supply such equipment through regular non-heating circuits, then such equipment may be connected to this special circuit or circuits and the electric consumption thereof will be billed at the kilowatt-hour rate specified herein.

4. The eight monthly billing periods referred to above as the heating season shall start with the monthly period covered by regular October meter readings and shall end with the period covered by the regular meter readings in May of the succeeding year.
