2.9 Payment of Charges

For the purpose of billing, the start of service is the day of acceptance by the Customer of the Company's service.

All recurring charges which are determinable in advance, including minimum charge, are billed monthly in advance. Charges based on actual usage during a month will be billed monthly in arrears. Installation and other nonrecurring charges are payable upon demand by the Company. The Customer will be billed for all usage accrued beginning immediately upon access to the service. For the purpose of computing charges, a month is considered to consist of 30 days.

Customer bills for telephone service are due when they are rendered. A Customer is in default unless payment is made on or before the due date specified on the bill.

In the event that legal action is instituted by the Company to recover any sums then due and the Company prevails, the Company shall be entitled to recover its costs of collection, legal costs, court costs and reasonable attorneys' fees, in addition to whatever other relief the court may award. Any sums then due shall earn interest at the rate of 1.5% simple interest per month (unless a lower rate is prescribed by law, in which event at the highest rate allowed by law), from the date these sums were accrued until the entire debt is paid in full. 2.16 Credits, (Cont'd.)

4. Credit is computed by multiplying the monthly rate for the service by the ratio that the number of hours (including fractional parts calculated to the nearest tenth of an hour) in the period of interruptions bears to 720. Each interruption is considered separately for purposes of establishing credit allowance.

2.17 Special Customer Arrangements

In cases where a Customer requests special arrangements which may include engineering, installation, purchase or lease of facilities, and/or other special services not offered under this tariff, the Company, at its option, will provide the requested services. P. Direct Inward Dial (DID) Service

DID Service is an optional feature which can be purchased in conjunction with Company-provided PBX Trunks. DID Service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID numbers apply in addition to charges specified for PBX trunks. One additive charge applies for each DID-equipped PBX trunk. Blocks of number groups will be determined at the sole discretion of the Company's resources. Whenever possible, the Company will attempt to provide telephone numbers arranged consecutively in a group, but will not guarantee nor accept responsibility for provision of such an arrangement. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine efficient telephone number utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers.

The Customer has no property rights to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or the end office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.

Where all numbers in a number group have not been connected for service, the Customer is responsible for providing interception of calls to vacant or non-working assigned station lines or telephone numbers by means of attendant intercept or recorded announcement service. The Company will not terminate these numbers to an intercept message on the Customer's behalf.
