5. USE OF SERVICE (Continued)

b. Service furnished by the Company may be arranged for use of End Users. Payment for the Company's service in such instances is the ultimate responsibility of the End User, the called party, or a third party, depending on the billing method requested. Payment arrangements are mutually agreed upon by the Company and the End User prior to the completion of a telephone call. The End User when placing a call selects a billing method in accordance with his or her preference. Calls are initially intercepted by a Company operator or equipment which identifies the Company. Either a "live" Company operator obtains the appropriate billing information or the End User enters the billing information directly. The call will then be completed.

c. Service furnished by the Company shall not be used for any unlawful purpose.

6. PAYMENT ARRANGEMENTS

a. The End User is responsible for payment of all charges for services furnished by the Company.

b. Any governmental assessments, fees, license, or other similar taxes or fees imposed upon the Company shall be added pro rata, insofar as practical, to the rates and charges stated in the Company's tariff. The Company shall add to the bill of the end user an amount sufficient to recover any such tax or fee.

c. Billing will be payable upon receipt.

d. End Users may dispute charges to the Company. Any disputes regarding intrastate calls and charges may be appealed to the Kentucky Public Service Commission.

5. RATE MILEAGE DETERMINATION

For the purpose of determining airline mileage, vertical and horizontal grid-lines have been established across the United States and Canada. The spacing between adjacent vertical grid-lines and between horizontal grid-lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each Local Exchange Company primary serving office or serving office from its latitude and longitude location by use of appropriate map-projection equations. A pair of V&H coordinates locates a primary serving office or serving office for determining airline mileage, at a particular intersection of an established vertical grid-line with an established horizontal grid-line. The distance between any two primary serving offices or serving offices is the airline mileage computed as explained below. The Company concurs with the V & H coordinates in South Central Bell's Kentucky Local Exchange Services Tariff.

To determine the rate distance between any two primary serving offices or serving offices proceed as follows:

- a. Obtain the "V" and "H" coordinates for each local exchange company primary serving office or serving office.
- b. Obtain the differences between the "V" coordinates of the two primary serving offices or serving offices. Obtain the difference between the "H" coordinates.

NOTE: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

5. RATE MILEAGE DETERMINATION (Continued)

- c. Square each difference obtained in b., preceding.
- d. Add the squares of the "V" difference and the "H" difference obtained in c. above.
- e. Divide the sum of the squares obtained in d. above by 10.
- f. Obtain the square root of the result obtained in e. above. This is the interexchange rate distance in miles. (Fractional miles are rounded to the next higher mile).

Example:

The rate mileage distance between Louisville and Winchester, Kentucky.

Formula:
$$\frac{(6529-6441)^2 + (2772-2509)^2}{10}$$

Distance = 88 miles.
