TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Sheet 14 Replaces the 3rd Revised Sheet 14.
- C. **Paragraph Numbering Sequence** - There are five levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1 (A)
 - 2.1.1 (A).1
- D. **Check Sheet** - When a filing is made with the Commission, an updated Check Sheet accompanies the filing. The Check Sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision.

However, this provision does not preclude an agreement between the Customer, Authorized User, or Joint User to share the cost of the Service as long as this arrangement generates no profit for anyone participating in a joint use or authorized use arrangement.

SECTION 2 – RULES AND REGULATIONS

2.4 Use of Service (continued)

2.4.4 Service furnished by the Company may be arranged for joint use or authorized use. The Joint User or Authorized User will be permitted to use such Service in the same manner as the Customer, but subject to the following conditions.

- (A) The Customer must complete and provide to the Company all Service agreements and/or other documentation required by the Company to initiate Service.
- (B) One Joint User or Authorized User must be designated as the Customer. The designated Customer does not necessarily have to have communications requirements of its own. The Customer must specifically name all Joint Users or Authorized Users in the application for Service. Service Orders which involve the start, rearrangement or discontinuance of joint use or authorized use of Service will be accepted by the Company only from that Customer and will be subject to all requirements of this Tariff.
- (C) All charges for the Service will be computed as if the Service were to be billed to one Customer. The Joint User or Authorized User, which has been designated as the Customer will be billed for all components of the Service and will be responsible for all payments to the Company. If designated Customer fails to pay the Company, each Joint User or Authorized User will be liable to the Company for all charges incurred as a result of its use of the Company's Service. Each joint or Authorized User must submit to the designated Customer a letter guaranteeing payment for the joint or Authorized User's portion of all charges billed by the Company to the designated Customer. This letter must also specify that the joint or Authorized User understands that the Company will receive a copy of the guaranty from the designated Customer. The designated Customer will be responsible for allocating charges to each Joint User or Authorized User.

SECTION 2 -- RULES AND REGULATIONS

2.4 Use of Service (continued)

2.4.4 (continued)

(D) Joint use is a Service/billing allocation arrangement and not a resale arrangement. Neither the Customer nor any Joint User nor any third party engaged by either of them in connection with a joint use agreement or arrangement may mark up Service or otherwise profit from the joint use agreement or arrangement.

2.4.5 If the Company reasonably concludes that Customer-provided equipment does not pass back appropriate answer supervision to the long distance network, the Company will notify the Customer. If the Customer cannot correct the problem and if Customer-provided equipment continues to provide inappropriate answer supervision to the long distance network, the Company reserves the right to suspend or terminate the Customer's Service. The Company will give the Customer five (5) days' written notice of its intent to terminate Service.

2.4.6 From time to time, the Company may grant credits against usage or monthly recurring or non-recurring charges in an amount not to exceed \$1,000 per Customer or account per monthly billing period whenever the Company determines in its sole discretion that such credit is warranted due to considerations involving the delivery of past service to the Customer or account receiving the credit.

2.4.7 The Customer will be billed directly by the LEC or CAP or any other authorized access provider for the Dedicated Access arrangements selected by the Customer for the provisioning of certain Switched Services or dedicated Services. At the Customer's request, the Company may act as agent in the ordering of such arrangements. In instances where the Company orders such arrangements as an agent for the Customer, the Company will bill the Local Access charges to the Customer.

2.4.8 Upon nonpayment of any sum owing to the Company, or upon a violation of any of the provisions governing the furnishing of Service under this Tariff, the Company may, upon written notification to the Customer, without incurring any liability, immediately discontinue the furnishing of such Service. The Customer will be deemed to have canceled Service as of the date of such disconnection and will be liable for any cancellation charges set forth in this Tariff. If the Customer uses 10XXX or other carrier access codes once the Customer's account has been canceled by the Company, the Customer is a Customer of the DUC, not the Company; provided that where the Company has a Carrier Identification Code (CIC) separate from that of the DUC and the Customer uses 10XXX or similar means to access that CIC, the Customer remains a Customer of the Company if the agreement between the Company and the DUC so provides.

The Customer is responsible for paying for all Services the Company provides to or from the Customer's number(s), regardless of whether the Customer's facilities were fraudulently used or used without Customer's knowledge in full or in part. These responsibilities are not changed due to any use, misuse or abuse of the Customer's Service or Customer-provided equipment by third parties, the Customer's employees or the public. Where such waiver is permitted by applicable law, a Customer acquiring calling card or authorization code Service from the Company expressly and voluntarily waives the provisions of Section 226.12(b) of Regulation Z, 12 C.F.R. § 226.12(b).

2.12 Mileage Measurements

2.12.1 Calls are mileage by the DUC that carries the call. The mileage between rate centers is calculated based on V and H coordinates as obtained by reference to AT&T Tariff FCC No. 10. Calculation between service wire centers is based on V and H coordinates as obtained by reference to NECA FCC Tariff No. 4. The mileage for a call between access lines associated with stations that use the same rate center is one mile. If Feature Group B is used, the distance will be measured from the rate center of the tandem location or network site to which the Feature Group B line is connected. If Feature Group D access is used, the distance will be measured from the rate center of the calling number.

2.12.2 Airline mileage between service locations is calculated as follows:

Where V_1 and H_1 are the V and H coordinates of point 1 and V_2 and H_2 are the coordinates of point 2.

Mileage is rounded up to an integer value to determine the airline mileage.

2.12 Mileage Measurements (continued)

2.12.3 The rate mileage for the Interoffice Channel (“IOC”) on a two-point Data Service is the airline distance measured between two Company-designated POPs associated with each end of the Circuit.

2.12.4 Calculation of IOC Channel mileage between the two Company-designated POPs is based on V and H coordinates as obtained by reference to National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. The Airline Mileage between two Company-designated POPs is calculated as follows:

$$\sqrt{\frac{[(V_1 - V_2)^2 + (H_1 - H_2)^2]}{10}}$$

Where V₁ and H₁ are the V and H coordinates of point 1 and V₂ and H₂ are the coordinates of point 2.

2.12.5 For the IOC, Fractions of a mile are rounded up to the next whole mile before rates are applied.

2.13 Timing of Calls

2.13.1 On Direct-Dialed calls chargeable time begins when the called Station answers and the connection is established between the calling Station and the called Station, miscellaneous common carrier, mobile radio system, or PBX system. Answer detection is determined based on standard industry answer detection methods, including hardware and software answer detection. However, when Services are directly connected to a Customer-provided communications systems at the Customer's or End User's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Company's Service so that chargeable time may begin.

2.15 Determining Rate In Effect

For outbound Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the calling station determines the rate in effect. For Toll Free Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the called station determines the rate in effect. If a unit of time is split between two (2) or more rate periods, each rate period applies to the portion of the call that occurred during that rate period rounded to the nearest billing increment. For Dedicated Access Services, when a call or unit of time is split between two rate periods, the rate is based on the rate period in which it began. If a Call is completed by an operator, the time at the beginning of each initial or additional rate period determines the applicable rate period. When a Call spans more than one rate period, total charges for each rate period are calculated and the results for each rate period are totaled to obtain the total message charge.

CS Services are inbound and outbound customized telecommunications Services designed to provide a unified Service for single or multi-location companies. These Services offer the Customer various combinations of direct dial long distance, TFS, calling card, and directory assistance Services. The Company determines the DUC. These Services are limited to those Customers who subscribe to the companion interstate Service. Verified and non-verified account codes are available at no additional charge. For Customers with multiple locations, there is a monthly recurring charge per service per billing location. Except for the intrastate usage rates set forth in Section 4 herein, these Services are subject to the rates, terms, and conditions for interstate Service including any minimum revenue and term plan requirements. Except for Calling Card Calls, all calls are billed in six (6) second increments subject to a minimum connect time of eighteen (18) seconds, and all calls are rounded up to the next highest six (6) second increment. For example, a twelve (12) second Call would be billed as eighteen (18) seconds while a twenty (20) second Call would be billed as twenty-four (24) seconds. Calling Card Calls are billed in one minute increments subject to a minimum connect time of one minute. All Calling Card calls are rounded to the next highest minute.

3.4.1 CS 800 Card Service Authorized Users are provided with a card issued to Customer. Authorized users may access the Company's system via a toll free carrier access code dialed from any dual tone multi-frequency signaling telephone. After Authorized User enters the Customer's PIN, this service automatically calls to a pre-selected called station. Calls are billed in one minute increments subject to a minimum connect time of one minute. All calls are rounded to the next highest minute.
