3.1 Intrastate Long Distance Service

3.1.1 Description

Intrastate Long Distance Service is available to Customers who subscribe to the Company's local exchange service at a minimum of one location. The Intrastate Long Distance Service Customer may select the Company for both intraLATA and interLATA calling, or for interLATA-only calling.

A qualified Customer may also subscribe to Intrastate Long Distance Service at other service locations not served by the Company's local exchange service through either the local exchange service provided by another local exchange company ("Switchless") or through a dedicated long distance facility. If the Customer discontinues their Company-provided local exchange services such that the only remaining service is the Switchless location or dedicated long distance facility, the Company reserves the right to discontinue the Switchless and/or dedicated long distance facility service after thirty (30) days advance notice to the Customer.

The Intrastate Long Distance Service Customer may select a usage tier based on estimated usage for locations served by the Company. If the Customer fails to meet the usage requirements for the estimated usage tier, the Company will reassign the Customer to an appropriate tier.

Optional Toll Free Service is offered to Customers at both Company-provided and Switchless locations.

5.1 Grandfathered Services

5.1.1 TimeOut (1+ Dialing) Service

The following services are available only to the Company's Customers of record as of October 15, 2001.

A. General Description

TimeOut (1+ Dialing) Service is an interLATA long distance service that is flat rated and is billed in six (6) second increments. Service is available to Customers over the Company's switched or switchless access lines. No minimum volume commitment is required.

This service can also be provided as a dedicated on-net direct dial service over the Company's carrier's digital network utilizing a DS-1 connection between the Company's switch and the carrier's nearest hub. All off-net services will be handled on a contractual basis only.

B. Timing of Calls

Long distance usage charges are based on actual usage. Chargeable time begins when a connection is established between the calling station and the called station. Chargeable time ends when either party "hangs up" thereby releasing the network connection. If the called station hangs up, but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the network. Chargeable time does not include time lost because of faults or defects in the connection.
