Murray, KY 42071

RE: Murray Water District Number One

Dear Mr. Thomas:

In accordance with paragraph ten (10) of the original contract between Water District Number One and the City of Murray, Kentucky, that states "the water rates may be changed by agreement between the parties," the City of Murray requests that the rates be changed as follows:

CURRENT RATE

- A. All water, 50¢ per 1,000 gallons; minimum bill \$150.00.

NEW RATE EFFECTIVE OCTOBER 1, 1982

- A. All water, 60¢ per 1,000 gallons; minimum bill \$150.00.

This rate change reflects the increase that the Murray City Council voted for all water customers in June, 1982. The change in rates is necessary due to increased operational costs, and compliance with more stringent and complex water quality regulations.

We would appreciate your discussion of this matter with your board and advise us accordingly of your concurrence.

Cordially yours,

Tom Marshall, Director
Murray Municipal Utilities
Water & Wastewater Division
