RULES AND REGULATIONS

1. These rules and regulations are in addition to the rules and regulations of the Utility Regulatory Commission.
2. Any resident of the Salt River Water District is eligible for water service from the District if it is financially feasible for the District to provide such service.
3. Water service will be terminated within 12 hours after receiving a written request from the customer.
4. All applications for service must be accompanied by a deposit of \$20.00 to assure payment of bill. This constitutes 2/12 of the estimated annual bill of customer or applicant. See Addendum A attached which is made a part hereof. (807 KAR 25:020 Section 7)
5. The customer is responsible for piping the water into his house and for installing the plumbing in said house.
6. Applications for a water connection shall be accompanied by a tap-on fee of \$350.00. Such water connection shall meet provisions as set forth in(807 KAR 25:050, Section 12) wherever applicable, and is attached hereto as a part hereof as Addendum B.
7. A separate meter must be used for each residence ^{unless otherwise} approved by the Board of Commissioners.

RULES AND REGULATIONS

8. Water bills will commence on the day meter or meters are set for a connection and water is available.
9. The District may terminate any customer's water service upon his failing to pay his water bill when thirty days past due or for violation of District regulations. (Subject to conditions which apply as set forth in URC: Gen -1-XL.
10. When service is requested by a customer for vacant lots owned by him, a meter connection must be purchased for one out of every three adjacent lots under one ownership. If there are only two vacant lots under one ownership one connection must be secured. A customer who owns several lots on the same street, but not adjacent may secure connection for not less than one half of the lots.
11. Water may not be used for resale purposed by any customer. Such resale shall constitute a commercial enterprise and commercial rates shall apply.
12. There will be a \$3.00 charge for inspecting a meter upon customers request. Charges will not be applied prior to inspection as required by Commission policy. If meter is defective, rules and regulations concerning Bill Adjustment as set out in 807 KAR 25:020 Section 9 shall apply, copy of which is attached hereto and made a part hereof as Addendum C.

ADDENDUM

A

Section 7. Deposits (1) A utility may require from any customer or applicant for service a minimum cash deposit or other guaranty to secure payment of bills of an amount not to exceed two-twelfths ($2/12$) of the estimated annual bill of such customer or applicant, where bills are rendered monthly or an amount not to exceed three-twelfths ($3/12$) of the estimated annual bill of such customer or applicant, where bills are rendered bimonthly or an amount not to exceed four-twelfths ($4/12$) of the estimated bill of such customer or applicant where bills are rendered quarterly.

(2) The utility shall issue to every customer from whom a deposit is received a certificate of deposit, showing the name of the customer, location of initial premises occupied, date and amount of the deposit.

Section 8. Complaints. Upon complaint made by a customer either at its office or in person, the utility shall make a prompt and complete investigation and advise the complainant thereof.

ADDENDUM

B

Section 12. Extension of Service. (1) Normal extension. An extension of fifty (50) feet or less shall be made by a utility to its existing distribution main without charge for a prospective customer who shall apply for and contract to use service for one (1) year or more and provides a guarantee for such service.

(2) Other extensions:

(a) When an extension of the utility's main to serve an applicant or group of applicants amounts to more than fifty (50) feet per applicant, the utility may if not inconsistent with its filed tariff require the total cost of the excessive footage over fifty (50) feet per customer to be deposited with the utility by the applicant or the applicants, based on the average estimated cost per foot of the total extension.

(b) Each customer receiving service under such extension will be reimbursed under the following plan: Each year for a period of not less than ten (10) years, which for the purpose of this rule shall be the refund period, the utility shall refund to the customer or customers who paid for the excessive footage the cost of fifty (50) feet of the extension in place for each additional customer connected during the year whose service line is directly connected to the extension installed and not to extensions or laterals therefrom, but in no case shall the total amount refunded exceed the amount paid to the utility. After the end of the refund period, no refund will be required to be made.

(3) An applicant desiring an extension to a proposed real estate subdivision may be required to pay the entire cost of the extension. Each year for a period of not less than ten (10) years the utility shall refund to the applicant who paid for the extension a sum equivalent to the cost of fifty (50) feet of the extension installed for each additional customer connected during the year but in no case shall the total amount refunded exceed the amount paid to the utility. After the end of the refund period from the completion of the extension, no refund will be required to be made.

(4) Nothing contained herein shall be construed to prohibit the utility from making extensions under different arrangements provided such arrangements have been approved by the commission.

(5) Nothing contained herein shall be construed as to prohibit a utility from making at its expense greater extensions than herein prescribed, should its judgment so dictate, provided like free extensions are made to other customers under similar conditions.

CS 85

ADDENDUM C

X Section 9. Bill Adjustment. (1) Whenever a meter in service is found upon periodic request or complaint test to be more than two percent (2%) fast, additional tests shall be made at once to determine the average error of the meter. Said tests shall be made in accordance with the commission's regulation applicable to the type of meter involved.

(2) If the result of tests on a customer's meter shows an average error greater than two percent (2%) fast, then the customer's bills, for the period during which the meter error is known to have existed, shall be recomputed and the account adjusted on the basis of the test. In the event the period during which the meter error existed is unknown, then the customer's bill shall be recomputed for one-half (1/2) of the elapsed time since the last previous test but in no case to exceed twelve (12) months. (See exception in subsection (5) of this section.)

(3) If the result of tests on a customer's meter shows an average error greater than two percent (2%) slow, then the customer's bill, for the period during which the meter error is known to have existed, may be recomputed and the account adjusted on the basis of the test. In the event the period during which the meter error existed is unknown, then the customer's bill may be recomputed for one-half (1/2) of the elapsed time since the last previous test but in no case to exceed twelve (12) months.

(4) It shall be understood that when a meter is found to have an error in excess of two percent (2%) fast or slow the figure for calculating the amount of refund or the amount to be collected by the utility shall be that percentage of error as determined by the test; i.e., it is the duty of the utility to maintain the accuracy of its measuring devices as nearly 100 percent as is commercially practicable. Therefore, percent error shall be that difference as between 100 percent and that amount of error as is indicated by the test.

(5) The burden of maintaining measuring equipment so that it will register accurately is upon the utility; therefore, if meters are found upon test to register fast and if time for periodic test has overrun to the extent that one-half (1/2) of the time elapsed since the last previous test exceeds twelve (12) months, the refund shall be for the twelve (12) months as specified in subsection (2) of this section and in addition thereto, a like refund for those months exceeding the periodic test period; provided, however, that the commission may relieve the utility from this requirement in any

particular case in which it is shown that the failure to make the periodic test was due to causes beyond the utility's control.

(6) Each utility shall make a reasonable attempt to determine if the amount of consumption for the current billing period for each customer is unduly excessive. If a comparison of consumption indicates a necessity therefor, a test of the customer's meter shall be made, and if the meter is found to register incorrectly to the customer's prejudice more than two percent (2%), the utility shall recalculate the customer's bills in accordance with the foregoing provisions.

(7) When a meter is tested and it is found necessary to make a refund or back bill a customer, the customer shall be notified in substantially the following form:

On _____, 19____, the meter bearing identification No. _____ installed in your building located at _____ (Street and Number) in _____ (City) was tested at _____ (On premises or elsewhere) and found to register _____ (Percent fast or slow). The meter was tested on _____ (Periodic, Request, Complaint) test.

Based upon this we herewith _____ (Charge or Credit) you with the sum of \$ _____, which amount has been noted on your regular bill.
