ARTICLE 22. CONTRACTS AND SERVICE ARRANGEMENTS. The Commission may make all provisions concerning contracts for sale of water, connection charges, and other disposition of District services and assets, including the plan of collecting proceeds thereof. The system manager may at his discretion discontinue delivery of water to any delinquent customer. The District will install, maintain and operate a main distribution pipe line or lines from the source of water supply and service lines from the main distribution pipe line or lines to the property line of each customer of the District, if the District Commission determines it is feasible to serve such customer, at which points, designated as delivery points, meters to be purchased, installed, owned and maintained by the District shall be placed. The cost of service line or lines from the main distribution pipe line or lines of the District to the property line of each customer shall be paid by the District or the customer, or both, in a manner to be determined by the Commission at the time of installation depending upon the length of the service line. The District will also purchase and install a cut-off valve in each service line from its main distribution line or lines, such cut-off valve to be owned and maintained by the District and to be installed on some portion of the service line owned by the District. The District shall have the sole and exclusive right to the use and operation of such cut-off valve.

Each service line shall connect with the District's water system at the nearest available point to the place of desired use by the customer if the District's water system shall be of sufficient capacity to permit the delivery of water through a service line at that point without interfering with the delivery of water through a prior service line. If the District's water system shall be inadequate to permit the delivery of water through a service line installed at such point without interfering with the delivery of water through a prior service line, then such service line shall be installed at a point to be designated by the Commission. Each customer will be required to install and own the service line from the meter to the place of use on his premises and to maintain such portion of the service line.

Each customer shall be entitled to purchase from the District pursuant to such agreements as may from time to time be provided and required by the Commission such water as the customer may desire, subject, however, to the provisions of these By-Laws and to such rules and regulations as may be prescribed by the Commission, provided, however, that should a customer sell or dispose of a portion of his property or subdivide the same, he or the new owner of each such new tract may not demand water and taps without paying connection fees for each such tract to be served.
