Subject: Owen Electric Tariff Filing 604

Ms. Chappell,

Staff had a couple of questions regarding Owen Electric's tariff filing to remove the sections of the tariff dealing with Electric Thermal Storage devices.

1. Owen Electric has not included PSC No. 6, First Revised Sheet No. 5 in the cancelled tariff pages. Confirm that this sheet should also be cancelled or explain why not.
2. The special contract largely mirrors the current tariff agreement language except items 2 - 4.
 - a. Explain why Owen Electric did not include the current language that insures a minimum of 10 hours per day charging time for ETS unit(s).
 - b. Explain whether the proposed contract language of "disconnection of electric service to the ETS device located at the address associated with this agreement" significantly extends Owen Electric's current obligation to provide discounted rates "for ten (10) years from date of installation."

Responses can be e-mailed back to me at this address.

If you have any questions, please give me a call at (502) 782-2626 or respond to this e-mail.

Thanks.

Daniel
