

**Date: January 18, 2010**

**To: TVPPA Members Using the 1990 TVPPA Joint Use Contract with AT&T**

**From: Jack W. Simmons, President & CEO**

**Subject: 2009 Rental Rates**

**Please Note:** These rental rates should only be used by TVPPA members who have declined using the new 2010 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

For distributor members who entered into the 1990 joint-use-of-poles contract with the Bell Telephone Companies (now AT&T) and declined using the 2010 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, we have received from AT&T the new 2009 joint-use rates for TVPPA members to use. These rates reflect an increase of 4.19 percent and are effective retroactively to January 1, 2009.

The joint-use rates retroactive to January 1, 2009, are:

- |    |  |         |
|----|--|---------|
| 1) | Urban or 40' or over poles<br>(An increase from \$23.50) | \$24.48 |
| 2) | Rural or 35' or under poles                              |         |
|    | (a) TVPPA members pay<br>(An increase from \$23.06)      | \$24.03 |
|    | (b) Telephone Co. pays<br>(An increase from \$18.25)     | \$19.01 |

If your system entered into the 1990 contract and declined using the 2010 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, you should approach the AT&T representative in your state and request an invoice for the 2009 fees due for joint-use of poles. The AT&T invoices should reflect the new increased rental rates as listed above. Your system should immediately prepare a joint-use invoice using these new rates according to the contract and send it to the AT&T Company with which you have executed your joint-use contract.

Attached are the new cost appendices that became effective on January 1, 2010. As with the joint use rates above, these should only be used by TVPPA members who have declined using the new 2010 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

If you have any questions or need further assistance, please contact Buddy Stansberry @ 423-648-2474 or [cstansberry@tvppa.com](mailto:cstansberry@tvppa.com) .

**Date: February 1, 2011**

**To: TVPPA Members Needing the 1990 TVPPA/AT&T Joint Use Contract Rates & Other Cost Information**

**From: Jack W. Simmons, President & CEO, TVPPA**

**Subject: 2010 Rental Rates**

**Please Note:** These rental rates should only be used by TVPPA members who have declined using the new 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

For distributor members who entered into the 1990 joint-use-of-poles contract with the Bell Telephone Companies (now AT&T) and declined using the 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, we have received from AT&T the new 2010 joint-use rates for TVPPA members to use. These rates reflect an increase of 0.64 percent and are effective retroactively to January 1, 2010.

The joint-use rates retroactive to January 1, 2010, are:

- |    |  |         |
|----|--|---------|
| 1) | Urban or 40' or over poles<br>(An increase from \$24.48) | \$24.64 |
| 2) | Rural or 35' or under poles                              |         |
|    | (a) TVPPA members pay<br>(An increase from \$24.03)      | \$24.18 |
|    | (b) Telephone Co. pays<br>(An increase from \$19.01)     | \$19.13 |

If your system entered into the 1990 contract and declined using the 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, you should approach the AT&T representative in your state and request an invoice for the 2010 fees due for joint-use of poles. The AT&T invoices should reflect the new increased rental rates as listed above. Your system should immediately prepare a joint-use invoice using these new rates according to the contract and send it to the AT&T Company with which you have executed your joint-use contract.

Attached are the new cost appendices that became effective on January 1, 2011. Please note that the 2009 and 2010 appendices are included for comparative purposes. As with the joint use rates above, these should only be used by TVPPA members who have declined using the new 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

If you have any questions or need further assistance, please contact Doug Peters @ [dpeters@tvppa.com](mailto:dpeters@tvppa.com) or 423-648-2473.

**Subject:** 2011 Joint Use Rates & 2012 Appendices  
**Importance:** High

**Re: 2011 Joint Use Rates**

This e-mail will provide an update on applicable attachment rates for the 2011 retroactive billing and, in the case of the TVPPA members that are still using the 1990 joint use contract, the new cost appendices that become effective on January 1, 2012.

**Systems Using the 2009 Joint Use Contract:** Most TVPPA member systems that are using the TVPPA/AT&T agreement have elected to adopt the new 2009 joint use contract. Under that agreement, the joint use rate retroactive to January 1, 2011 is \$29.00, and your system should be using cost-based rates for work that was previously covered by the appendices to the 1990 agreement.

The rates for 2012 (billed in early 2013) under the 2009 joint use contract will be adjusted based upon the change Handy-Whitman Index later this year. TVPPA will circulate the adjusted rates for the retroactive 2012 rates in a communication about this time next year.

**Systems Using “Old” 1990 Joint Use Contract:** For TVPPA member systems that entered into the 1990 joint-use-of-poles contract with the Bell Telephone Companies (now AT&T) and declined to use the 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, we have received from AT&T the new 2011 joint-use rates for those TVPPA members to use. These rates reflect an increase of 0.42 percent and are effective retroactively to January 1, 2011.

The joint-use rates under the 1990 Contract retroactive to January 1, 2011, are:

- |     |  |         |
|-----|--|---------|
| (1) | Urban or 40' or over poles<br>(An increase from \$24.64) | \$24.74 |
| (2) | Rural or 25' or under poles                              |         |
| (a) | TVPPA members pay<br>(An increase from \$24.18)          | \$24.28 |

(b) Telephone Co. pays  
(An increase from \$19.13) \$19.21

If your system entered into the 1990 contract and declined using the 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, you should approach the AT&T representative in your state and request an invoice for the 2011 fees due for joint-use of poles. The AT&T invoices should reflect the new increased rental rates as listed above. Your system should immediately prepare a joint-use invoice using these new rates according to the contract and send it to the AT&T Company with which you have executed your joint-use contract.

Attached are the new cost appendices that became effective on January 1, 2012. As with the joint use rates above, these should only be used by TVPPA members who are using the 1990 Contract and have declined using the new 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

If you have any questions or need further assistance, please contact Doug Peters @ [dpeters@tvppa.com](mailto:dpeters@tvppa.com) or 423-756-6511.

Additional payments to be made by either the Telephone or Power Company

Payment for one half cost of anchor and rod shall be as follows

3/4" ROD Double Eye, 8" Single Helix Anchor	69
1" or larger ROD Triple Eye, 8" Double Helix Anchor or Larger	96

Payment under Article VII, Section F, Paragraph 8, shall be the current cost in plant plus an attachment cost of \$25.00 for each cable, conductor, or neutral wire.

If Licensee is not present at any time that Owner removes an old pole and installs a new pole, and the Owner is required to make a second trip to the site, Licensee hereby agrees to pay \$30.00 to Owner.

The current cost of treated poles for emergency conditions as discussed in Article VII, paragraph B is as follows:

Height of Poles	Class 1	Class 2	Class 3	Class 4	Class 5	Class 6	Class 7	Class 9
25'	618	587	560	538	520	497	479	448

Subject: 2012 Joint Use Rates & 2013 Appendices

This e-mail will provide an update on applicable attachment rates for the 2012 retroactive billing and, in the case of the TVPPA members that are still using the 1990 joint use contract, the new cost appendices that become effective on January 1, 2013.

**Systems Using the 2009 Joint Use Contract:** Most TVPPA member systems that are using the TVPPA/AT&T agreement have elected to adopt the new 2009 joint use contract. Under that agreement, the joint use rate retroactive to January 1, 2012 is \$29.61, and your system should be using cost-based rates for work that was previously covered by the appendices to the 1990 agreement.

The rate for 2012 under the 2009 joint use contract has been adjusted based upon the Handy-Whitman Index and represents a 2.1% increase over the 2011 rate of \$29.00

**Systems Using "Old" 1990 Joint Use Contract:** For TVPPA member systems that entered into the 1990 joint-use-of-poles contract with the Bell Telephone Companies (now AT&T) and declined to use the 2009 Joint Use Contract negotiated

between TVPPA and AT&T to replace the 1990 agreement, we have received from AT&T the new 2012 joint use rates for those TVPPA members to use. These rates reflect an increase of 2.1% and are effective retroactively to January 1, 2012.

The joint-use rates under the 1990 Contract retroactive to January 1, 2012, are:

(1) Urban or 40' or over poles  
(An increase from \$24.74) \$25.26

(2) Rural or 35' or under poles

(a) TVPPA members pay  
(An increase from \$24.28) \$24.79

(b) Telephone Co. pays  
(An increase from \$19.21) \$19.61

If your system entered into the 1990 contract and declined using the 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement, you should approach the AT&T representative in your state and request an invoice for the 2012 fees due for joint-use of poles. The AT&T invoices should reflect the new increased rental rates as listed above. Your system should immediately prepare a joint-use invoice using these new rates according to the contract and send it to the AT&T Company with which you have executed your joint-use contract.

We have also attached the new cost appendices that become effective on January 1, 2013. As with the joint use rates above, these should only be used by TVPPA members who are using the 1990 Contract and have declined using the new 2009 Joint Use Contract negotiated between TVPPA and AT&T to replace the 1990 agreement.

If you have any questions or need further assistance, please contact Doug Peters @ [dpeters@tvppa.com](mailto:dpeters@tvppa.com) or 423-756-6511.

Additional payments to be made by either the Telephone or Power Company

Payment for one half cost of anchor and rod shall be as follows

3/4" ROD Double Eye, 8" Single Helix Anchor	70
1" or larger ROD Triple Eye, 8" Double Helix Anchor or Larger	98

Payment under Article VII, Section F, Paragraph 8, shall be the current cost in plant plus an attachment cost of \$25.00 for each cable, conductor, or neutral wire.

If Licensee is not present at any time that Owner removes an old pole and installs a new pole, and the Owner is required to make a second trip to the site, Licensee hereby agrees to pay \$30.00 to Owner.

The current cost of treated poles for emergency conditions as discussed in Article VII, paragraph B is as follows:

Height of Poles	Class 1	Class 2	Class 3	Class 4	Class 5	Class 6	Class 7	Class 9
25'	631	599	572	550	531	507	489	457
30'	810	764	717	679	642	603	568	524
